

Document Agent saves us 60 hours per month!

Challenge

Servi Group, one of Norway's leading suppliers of Power and Motion Control, produce over 2000 documents every month and needed to get these checked into IFS Applications in an efficient and secure manner.

Solution

Servi Group wanted a solution that could check in their documentations automatically, as long as the users sent the document to specific e-mail addresses.

Result

Addovation provided Servi Group with the Document Agent. The Document Agent works efficiently 24/7 and supports many different input channels. The efficient solution makes sure that the documents are checked into IFS Applications, to the right business object, at the right time.

Solution Delivered

Document Agent, Automation Server.

“

We are checking in more than 2000 documents per month and save approximately 2 mins per document. That gives us a reduction of more than 60 hours per month! We are very happy with this solution and would like to use it on other types of documents too.

Anne Lise Halvorsen, QA Manager,
Responsible for IFS Applications at Servi Group.
