

## PRESS RELEASE

DRAMMEN, October 2019

### Unilabs Go-live a success!

Unilabs, one of the largest diagnostic providers in Europe, wanted to replace their existing solution with a flexible and configurable standard ERP system to support future expansion and growth. They evaluated several prominent suppliers and found their partner in Addovation and the ERP system IFS Applications™.

“First and foremost, we were looking for a long term partner. A partner who understands our challenges and needs, and is eager to help us reach our goals. Together with Addovation, we have developed and implemented a solution for a central customer registry in IFS Applications,” said Unilab's CFO Agneta Trygg.

With a solid background and experience within business development and organizational changes, Addovation offers broad and deep knowledge in IFS Applications as well as many surrounding solutions. This made the two companies a perfect match going forward, allowing mutual growth.

“It is incredibly fun to see when two companies' shared values and strong initiatives grow together. We're looking forward to deliver the best solution for current and future needs,” said Addovation's Swedish CEO Per Kärnhall. “The next phase of the project has already commenced and we are looking forward to the next go-live” concludes Agneta Trygg.

#### **About Unilabs**

Unilabs is one of the largest diagnostic providers in Europe, and the only provider to offer laboratory, imaging and pathology specialties within one group. Founded in 1987 as three diagnostic laboratories in Switzerland, Unilabs grew rapidly with a strategy of acquiring high-quality partner laboratories around mainland Europe. In 2007, Unilabs merged with major imaging diagnostics company Capiro, whose reach encompassed Sweden, Norway, Finland, Denmark and the UK. This merger positioned Unilabs as the undisputed European leader in diagnostics. We have continued to grow our business alongside our portfolio of cutting-edge diagnostic services, moving from a European business to a worldwide operator, and establishing new offerings in genetic medicine and pathology amongst many other disciplines.
