

Full steam ahead into the future with IFS Applications™ 10

Sveba Dahlen selected Addovation as
their upgrade partner

Addovation ✓

“We are very pleased with the result, and impressed with the way Addovation assisted us with the upgrade and understood our business needs.”

Marcus Nilsson, CIO at Sveba Dahlen.

SVEBA DAHLEN PARTNERED UP WITH ADDOVATION

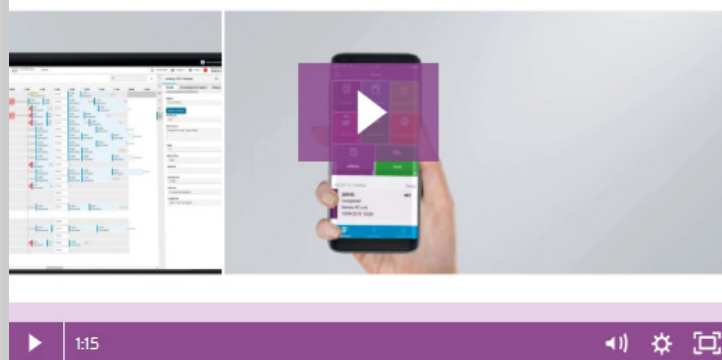

Sveba Dahlen is a leading global manufacturer in equipment for bakeries and the restaurant and hotel industry. They decided to upgrade their ERP system to IFS Applications™ 10 in May 2019. Addovation was the selected partner.

Sveba Dahlen recognized immediate benefits after the upgrade.

- Easier to do searches and find information.
- Tailored lobbies helps users to be more efficient.
- Better control of the system and processes with Custom fields.
- Better control of access rights and privileges across the organisation.
- Enhanced infrastructure secures stable operations and ensures future needs.
- Replacing customizations by using Custom objects.

IFS Applications™ 10 has been designed to provide a single complete ERP solution for global organizations.

Unlike competitive offerings that are too often generic, IFS Applications™ 10 provides industry-specific functionality that enables customers to create a competitive advantage.

“We feel that we have found a long term partner that can support our current and future ERP needs. We are now ready for future enhancements and business initiatives.”

Marcus Nilsson, CIO at Sveba Dahlen.

ADDOVATION AS YOUR UPGRADE PARTNER

Knowing IFS Applications™ down to the nuts and bolts gives us a huge advantage doing upgrades. We take on complete upgrade projects, or assist as a technical partner.

Working closely with our customers, we establish project plans, perform technical upgrades and conduct training activities. In parallel we lift configurations, configure reports, set up integrations and handle modifications.

Technical platforms and infrastructure for the new versions is installed and configured at the customer or the customer's hosting partner.
